

Data Domain modelling for antenna analysis and design

10 April 2014 – 11:00 – 12:40

Room Oceania

The workshop is aimed at the dissemination of knowledge acquired on the subject by an informal European working group active in this area and to elicit discussion on it.

The workshop will be based on a number of contributions on the subject matter, aiming at:

- Defining the motivations and the background.
- Discussing the current status and the role of EDX in this context.
- Proposing open issues and forthcoming needs.

The presentation will be focusing on technical details in order to allow the audience to get a deeper understanding on the subject. The discussion will be aimed at further clarifying the topic as well as to define perceived needs and possible ways forward.

Organisers:

F. Mioc (MVI)

M. Sabbadini (ESA)

Programme:

1. Motivation and background - Marco Saddadini (ESA)
2. Overview of EDX current status - Poul Erik Frandsen (TICRA)
3. Discussion - Introduction and moderator - F. Mioc (MVI)
4. Discussion and wrap-up
